Ÿ

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art of record fails to show or suggest a display device, as specifically called for in the claimed combination of claim 23, which comprises an underlying *panel* pivotally mounted (see line 4) to a rack and having a first display surface with a sample of a first displayed floor covering material mounted thereon (see lines 5-7), and an overlying *panel* having an inner edge pivotally mounted (see line 4) to the rack and a free edge distal the inner edge (see line 10) and the overlying panel overlying the underlying panel such that at least one of the width and height of the overlying panel is "sufficiently less" (see line 11) than one of the width and height of the underlying panel so that at least a portion of the sample is visible beyond the free edge of the overlying panel (see last two lines).

The declaration under 37 CFR 1.132 filed June 8, 2004 is sufficient to overcome the rejection of claims 23 and 24 based upon Howard '852 in view of Capel '809. Note especially section 11 which states that "the Howard '852 patent states that one of its objectives is to maintain a 'preadjusted acute angularity'... Modifying the Howard device... to include some 'pivotal' mounting mechanism, would run completely counter to this stated objective of maintaining a fixed angularity." The examiner respectfully agrees with this statement and thus to provide Howard with a pivotal mounting is not only unobvious but it would teach away from the intended use of Howard.

It is noted that although the prior art of record shows different features of the claimed invention, e.g., (a) U.S. Patent Nos. 4,253,259 and 4,682,697 show several devices displaying floor covering samples, such as carpet, but the display *panels* in these devices do not have panels

Application/Control Number: 10/072,032

Art Unit: 3634

ř

with differing widths or heights; (b) U.S. Patent No. 2,876,907, shows devices having overlying and underlying panels having differing widths; and (c) U.S. Patent Nos. 5,782,366 and 6,244,106 show devices having panels pivotally mounted to a rack, there is no motivation to combine any or all of these references to arrive at the instant invention. *For example*, it would not be obvious to combine the use of panels having different widths, as shown in 2,876,907, with a carpet sample, as shown in 4,253,259, since there is no motivation to place a carpet sample on a panel so that a portion of the sample is visible beyond the free edge <u>and</u> it would not be obvious combine panels, as shown in 6,244,106, with panels having different widths, as shown in 2,876,907, since the panels in a book are intended to be the same size.

It is noted that the after-final amendment filed June 8, 2004 is a copy of the after-final amendment faxed to the PTO on March 22, 2004 which was not matched with this application. Note that applicant has submitted a copy of the facsimile transmission (of March 22, 2004) with the amendment of June 8, 2004. *Thus*, since the after-final amendment of March 22, 2004 was submitted two months from the date of the mailing, i.e., January 22, 2004, of the final Office action, and the amendment of June 8, 2004 contains a proper showing that applicant responded to the final Office action in a timely manner, no extension of time is necessary for the amendment of June 8, 2004 to be entered and considered.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for

Allowance."

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Jennifer E. Novosad whose telephone number is (703)-305-2872.

The examiner can normally be reached on Monday-Thursday, 5:30am-4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Carl D. Friedman can be reached on (703)-308-0839. The fax phone number for the

organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
